

BAD CS209

This is the page you land on: HEADER

- Colours clash, hard on the eyes
- Does not match the footer, footer font colour is hard to read
- RULES are small, easy to miss, bad formatting
- What does top 1% mean
- Suggested groups: images are lost , don't tell you what they were.
- Not in alignment, confusing to read , where to go next ?
- MAIN BOX:
 - Rules are confusing, no context given, no signifiers, not everything is explained o (what is xy) o (there are no buttons called create post: there is one called press me) o Edit post: is not editing, its to re-blog, that is not the right symbol. o Rules are unclear
- Help could be hidden, click if needed
- POST button , red font is bad and hides text
- Post description is not a good description, more like post content (?)
- Two different fonts in the post creation. WHEN YOU CREATE POST:
- Upvote and downvote arrows are the wrong colour, should be switched
- The number next to the downvote arrow needs more signifiers
- The icon and edit buttons are switched,
- Red edit icon is hidden and should be more clear, more contrasting
- I don't like the colours chosen for text
- Editing is confusing, instead of going back to the original creation box, you should be able to edit wherever the post is on the screen.
- Should ask for confirmation before deleting
- UPVOTE: should only work once and can be taken away when pressed again, same with DOWNVOTE
